

GH PROGRESS UL

TYPE 3 FIRE HOSE WITH RUBBERIZED LINING & JACKET – UL LISTED

MATERIAL CONSTRUCTION

Jacket lining:

- Warp: High-tenacity polyester
- Weft: Polyamide; circular woven
- The special jacket construction ensures outstanding adhesion and much lower pressure loss compared to a 100% polyester jacket lining
- Totally embedded in the rubber, offering optimum protection against mechanical damage

Rubberized lining and jacket:

- Very high-grade NBR/PVC rubber compound, extruded through the weave in a special one-step production process
- Special additives in the compound guarantee outstanding resistance to aging and ozone

ADVANTAGES

- ✓ Very lightweight and highly flexible (also at extremely low temperatures)
- ✓ Small coil diameter
- ✓ Excellent resistance to aging and ozone
- ✓ Lining extremely resistant to seawater and a wide range of chemicals (see resistance table)
- ✓ Resistant to mildew and rot
- ✓ Easy to repair

AT A GLANCE

Temperature ranges

-20 °C bis 80 °C

(Specifications apply to Water)

Standard colors

red

Areas of application

- Refineries
- Chemical industry
- Military
- Airport fire departments
- Industrial and municipal fire departments
- Fire hose for tough conditions
- Refineries

PRESSURES

Specifications apply only to the hose (medium water, 20 °C). The potential working pressure may be lower than specified above for hose lines with couplings due to the nominal pressure of the couplings or the type of assembly.

BS 6391:2009 with British Instantaneous couplings:
Ø 38–76 mm: max. working pressure 15 bar Ø 89: max. working pressure 12 bar

Maximum working pressure:

Approval can only be given by the manufacturer upon clarification of the exact area of application.

Test pressure:

Maintained for 1 min.: In accordance with BS 6391:2009: Ø 38–89: 22.5 bar
